Delivery of well-layered, conventionally named files to match established studio protocols

Expert understanding of planning layouts based on reference and animatics.

Respect for production deadlines

PROFILE

Over 30 years demonstrated history working in traditional 2D, and Digital, Television and Feature Animation pipelines. Having bridged many creative rolls, including beginnings as an Inbetweener, then Animator, Concept Artist, Storyboard Artist, Pre-visualization Layout Artist and Layout Supervisor, I possess high-level knowledge of artistic and cinematic principles, perspective and composition. I am also well-versed in studio workflows and enjoy collaborating with pipeline departments to create a positive work culture, and bring the desired production style to screen.
